from two former beijing bureau chiefs with long experience in asian affairs comes a clear eyed and uncompromising look at the potentially disastrous collision course now taking shape in u s china relations aggressively anti american china has nuclear weapons deliberately targeted at the united states recent confrontations between chinese and american military forces indicate that china may try to take taiwan by force while our trade deficit rises to unprecedented heights the powerful new china lobby shapes u s policy with the support of american businesses eager for a share of its booming markets the coming conflict with china is required reading for those who wish to understand the tense global rivalry that is already shaping the course of the 21st century plunges harpoons into the tenderest interstices of the chinese american relationship new york times disturbing and provocative there is plenty to worry about wall street journal

this book investigates various dimensions of the economic conflicts between the us and other democratic market economy countries and state capitalist communist china in the past decade examining how differences in institutions and ideology bring these about through the lens of institutional analysis the book elaborates and explains the underlying institutional designs and reasons behind the disputes highlighting how such variances are embedded and reflect fundamental value divergences between china and other democratic countries this book will be of key interest to scholars students and practitioners in law economics political sciences

international relations international organisations and global governance

far more than a simple glossary this unique resource provides a detailed lexicography of political and social life in china today and deepens our understanding of the last twenty years of enormous change in the people s republic each of the 1 600 entries 1 is rendered in chinese characters 2 is alphabetized according to pinyin the chinese phonetic alphabet 3 is translated into english and 4 is explained in terms of the situation in which it first appeared and how its meaning shifted over time in addition to the main body of definitions and annotations there are three appendices abbreviations a name index and a bibliography

it is increasingly important for americans to think carefully about the vast complexities of the u s china relationship and the calculations that go into forming courses of action the key question is will china s so called first priority of economic development and its resulting influence on domestic social stability curtail china s continuing reliance on military force as a means of exerting its influence in addition will economic development enhance china s comprehensive national power and thus contribute to some of china s more unhealthy goals such as dominating the south china seas seizing taiwan by force or grabbing the senkaku islands from japan is the china taiwan economic dynamic strong enough to offset military adventurism how this dilemma is managed by the united states china and taiwan will affect the future of asia and perhaps the world we have tried to present in this book factual and analytical essays which stress the need for squarely addressing these questions

perhaps the most common question raised in the literature on coercive international sanctions is do sanctions work unsurprisingly the answer to such a sweeping question remains inconclusive however even the widely presumed logic of coercive sanctions that economic impact translates into effective political pressure is not the primary driver of conflict developments furthermore existing rationalist economic approaches neglect one of the most striking differences seen across sanctions conflicts the occurrence of positive sanctions or their combination with negative sanctions implicitly taking them as logically indifferent instead of asking whether

sanctions work this book addresses a more basic question how do coercive international sanctions work and more substantially what are the social conditions within sanctions conflicts that are conducive to either cooperation or non cooperation arguing that coercive sanctions and international conflicts are relational socially constructed facts the author explores the de escalation of sanctions conflicts from a sociological perspective whether sanctions are conducive to either cooperation or non cooperation depends on the one hand on the meaning they acquire for opponents as inducing decisions upon mutual conflict on the other hand negative sanctions positive sanctions or their combination each contribute differently to the way in which opponents perceive conflict and to its potential transformation thus it is premature to predict the political effectiveness of sanctions simply based on economic impact the book presents analyses of the sanctions conflicts between china and taiwan and over iran s nuclear program illustrating how negative sanctions positive sanctions and their combination made a distinct contribution to conflict development and prospects for cooperation it will be of great interest to researchers postgraduates and academics in the fields of international relations sanctions international security and international political sociology
